Re: Draft Administrative Settlement Agreement, Order on Consent and Statement of Work
Jorgensen Forge Facility, 8531 East Marginal Way South, Seattle Washington 98101
EPA Docket No. CERCLA-10-2003-001

Dear Mr. Blocker

Earle M. Jorgensen Company (EMJ) and Jorgensen Forge Corporation (Jorgensen) continue to be committed to designing and implementing the sediment cleanup identified in the Action Memorandum. As we have discussed, we continue to move forward with some of the cleanup permitting/design tasks and coordination with Boeing for concurrent construction projects in 2013/2014 (consistent with MOU/MOA). Concurrent construction in both areas (southern part of Plant 2 and area adjacent to Jorgensen property) will also allow tighter coordination with the cleanup contractor(s) to successfully sequence the work to minimize the potential for recontamination. This will also allow additional time for a possible NRD project to be negotiated with the Trustees and integrated into sediment/bank cleanup construction process.

The purpose of this letter is to formally request a 45 day extension for submittal of a redline/strike out version of the draft AOC/SOW provided to us in December 2011. We will submit a revised AOC/SOW on or before March 15th, 2012 and would want to schedule a meeting at that time to initiate negotiations.

If this revised timeline is acceptable, we request confirmation in writing as soon as practical. Meanwhile, we will continue the development of a redline/strike AOC/SOW. Meanwhile, if you have

Subject: Request for extention regarding new Order

To All;

Your 45 day extension for submission of the redline of the new Removal Order for Jorgensen Forge is approved. The new date for submission of a redline is March 15, 2012. A copy of this message will be printed and added to the file once you verify reciept.

Sincerely,

Shawn Blocker
